Quarterly Review: Larkspur Community Grants Program

1. Summary

The grants program closed its third quarter with a full pipeline and a modest surplus. Overall demand stayed close to the forecast prepared in April, and the committee approved every award on the schedule published in June.

2. Grant activity

Activity was steady through the quarter. Two review panels met twice each, and the second panel cleared the backlog of appeals that had accumulated since the spring cycle.

Applications received	118
Awards approved	42
Median award (USD)	4,250
Success rate	36%
Uncommitted balance	11,300

3. Observations

The committee observed that smaller grants were processed faster than large ones, mostly because large applications required an external assess-
ment before the panel could vote. That step adds roughly three weeks to the timetable and should be scheduled in advance.

4. Recommended actions

The panel recommends appointing a second assessor for the winter cycle and publishing the assessment criteria with the application form.

Note 1: The success rate counts withdrawn applications as received but not assessed. Figures cover 1 July to 30 September 2026.
